SUMMARY

I have a Master 2 degree in information systems engineering and I am currently enrolled in an MSc Expert in IT and Information Systems at EPSI in Paris. and I have been a web application developer and designer for over 3 years

PROFESSIONAL EXPERIENCE

Computer Science Research Laboratory of UMMTO (LARI)   **march 2024 -september 2024**

- design and development of a relational database with uml and sql and postgresql.
- development of two web platforms, one for the administrator and the other for partner restaurants
- development of a mobile application for end customers
- **technologies used**: react js javascript node js react native redux sql postgresql api maps api google , Haversine's formula which is used to calculate the distance between two points on a sphere from their longitude and latitude coordinates

PROJECTS

my projects as part of my computer science studies   **Since 2022**

- **team leader** in the design and development of email client and webmail software
- design and development of customer relationship management software with 3 mobile and web spaces
- the design and definition in SQL of databases of food products consumed by Algerians Development of a reference website for the Algerian government
- **team leader** in the creation of a 3d video game with c# on unity
- creating an instant messaging application with socket.io

SKILLS

frontend& backend web devloppement	database design : mongo db my sql postgresql rest api development	
programming languages : SQL , javascript , python	technologies : node js express js react js , tailwind css redux	Responsive Design

EDUCATION

●	Bachelor's degree in computer systems	**Sep 2021 - 2022**
●	Master 2 degree in information systems engineering	**Sep 2023 - 2024**
●	MSc Expert en informatique et système d'information – at EPSI - PARIS	**Sep 2024 - 2025**

ADDITIONAL INFORMATION

- **Languages :** English, French, amazigh.
- **Certifications :** CRASH COURSE ON PYTHON "coursera" │ USING PYTHON TO INTERACT WITH THE OPERATING SYSTEM "coursera" │ Python: The Complete Training 2024 From 0 to Python Expert "udemy"
- **interests :** Programming , Technology Watch and Innovation , IA, football , travell ,music, astronomy , physics
